Here the civilization of the fifteenth century is basking in the rays of the nineteenth. In the hurry and bustle of the modern and progressive city there is still a flavor of the old, indolent and dreamy days of Spanish occupancy. Although it is scarcely a score of years since Los Angeles began to attain prominence as one of the important towns of southern California, its life as a corporation antedates most of the oldest cities of the east. As early as 1542 Spanish priests and chevaliers visited the country, the former establishing missions among the Indians which left an indelible impress. Until the advent of the Americans,

ELIZA ARCHARD CONNER WRITES OF THEIR STATUS IN MANILA.

Thinks They Are Responsible For the Revolt of the Natives - Played Upon Their Ignorance and Superstition-Friars Versus Jesuits.

(Special Correspondence.) MANILA, May 15 .- The danger of reposing unlimited power in the hands of a single party, particularly a theological party, has a stupendous illustration in the recent history of the Philippine coming here from every state in the Islands. I never thought to live to say it but since coming here I am conscious of a feeling of pity for Spain. The Jesuit fathers were among those who disapproved, and the friers used their power to such an extent that they obtained an order prohibiting any Jesuit processions from parading Ma-

friers in Manila would be as unjust as to declare that the whole American people were as bad as their professional politicians. Hundreds of priests and good Catholic sisters and brothers in the Philippines have devoted their lives unselfishly to the attempt to improve the condition of the natives, and,

verily, these shall have their reward. Meanwhile high old times had the friars in and about Manila. On the fat of the land they lived, depriving themselves of no material enjoyment. They even resurrected patriarchal institutions and entered into picturesque domestic relations, rearing dusky families, in which the lick of the tar brush mingled, so to speak, with the expression of gained control of government affairs in Manila. They in time came to rule the municipal authorities as completely as ANTS AS FIGHTERS. Tammany boss ever ruled his followers.

Ants literally covered him. He turned on himself and swept them from his back, swarm of his plucky assailants. And then began a fight to the death. Again and again be swept his tormentors from his back while from all sides hurried streams of ants to take the place of fallen comrades. The wriggling of the big fellow became less violent as the fight progressed, and finally, after an effort, which I well knew was a desperate last one, he remained quiet while what little life was left in him was bitten out of him. Later, when the army had retreated and when we had swept up the centipeds and scorpions and lizards and a tarantula which the ant army had vanquished. we put the hero of the star battle under a quartz magnifying glass. "Perhaps you wonder what would happen to a man who would undertake to fight an army of ants, assuming, of course, that the man relies on his natural means of defense-his hands and feet. The man was a coolle who had sent here without delay, one brought worked on a cocoa plantation in a creek not far from Caracas. At dawn the shricks and cries of a man in agony aroused the inmates of the camp, who ran out to learn the eruse.

"The man was gesticulating wildly and calling for help, whiled he squirmed and writhed and slapped his face and neck and chest and legs in a mad effort to slap himself all ever at once.
